This document including its Annex details both the technical and administrative terms and conditions of this Preliminary Market Consultation held in the city of Maribor. Its contents may change without notice.

This final version is dated 21 June 2023. Its original version is kept in the contracting authority's records.

For further information and a copy of it in the native language of the country where the consultation is hosted, please contact:

@ANCI Toscana: climab@climaborough.eu

@the City of Maribor: Mateja.Bitenc@maribor.si

In case of discrepancies, the English version will prevail over any available translation.

After the finalisation of this Market Consultation, a Report with the general conclusions and its audio/video proceedings will be published in the project website <https://climaborough.eu/public-procurement/open-calls/>

At the same URL one can retrieve comparable information from the other 7 Preliminary Market Consultations held in parallel to this one.

**Co-funded by
the European Union**

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or CINEA. Neither the European Union nor the granting authority can be held responsible for them.

1 Introduction

ANCI Toscana is the Association of Tuscan Municipalities, based in Florence.

ANCI Toscana coordinates the CLIMABOROUGH innovation project, “Building Green and Climate Neutral City Hubs”, the purpose of which is to achieve a systemic transformation of Cities, supported by customised climate services, accompanied by a strategic, holistic and long-term focused investment approach, together with a new governance framework for climate.

By climate services we mean socio-technical systems that assist individuals in taking climate friendly decisions and actions, supported by specific data and information on the carbon footprint of human activities in the selected environments.

The project is co-funded by the European Union through its agency CINEA, under the Horizon Europe programme for research and innovation.

You can find more information on the project at this URL: <https://climaborough.eu/>

However, neither the European Union nor CINEA can be held responsible for any part of the process described herein.

In the context of CLIMABOROUGH, a public call for tender will be launched in September 2023, using the instrument of Innovation Partnership (as per art. 31 of the procurement directive 2014/24/EU) for the experimentation of a new and innovative concept of “Green and Climate Neutral Hub” in 8 EU cities, built on climate services and/or other socio-technical systems.

Involved cities are: **Athens** (EL), **Cascais** (PT), **Differdange** (LU), **Grenoble Alpes Metropoles** (FR), **Ioannina** (EL), **Maribor** (SI), **Sofia** (BG) and **Torino** (IT).

The Cities are clustered in **two thematic hubs**, one focused on the transition “*from waste to circularity*”, the other addressing the shift “*from isolated energy and mobility systems to integrated services*”.

Each City has formulated a specific Challenge – or problem to be solved – which will be presented in more detail during the respective Preliminary Market Consultation. There, the advice will be sought of economic operators, public authorities, R&D institutions, individual experts and professionals, including start up entrepreneurs and SME owners, on the possible existence in the state of the art of suitable solutions, which may tackle the challenges as they have been identified, or suggest reshaping some of them to ensure they can be fulfilled by the deployment of climate services and/or other socio-technical systems.

At the end of the procurement procedure, **there will be two awarded solutions per city**. Indicatively, the call for innovation partnerships will have a budget (VAT excluded) of €287,500.00 for each urban challenge.

2 Venue of the Preliminary Market Consultation

This document refers to the Preliminary Market Consultation in the City of Maribor.

The event is scheduled for the 17th July 2023 at 14:30 – 17:30 CEST and will be hybrid.

Until that time, participants can also send inquiries in writing, to: climab@climaborough.eu.

All received inquiries, duly anonymised, and their respective answers will be published at the URL: <https://climaborough.eu/public-procurement/open-calls/faq>.

Participation is free, upon registration at: <https://www.eventbrite.it/e/climaborough-preliminary-market-consultation-announcement-maribor-tickets-657720970127>.

Remote attendance is also welcome. The link to connect will be sent to participants upon registration.

Participants can also provide an idea in writing and/or book a speaking slot in the Q&A session using

the template provided as Annex to this document.

The event will be audio/video recorded and its proceedings, together with the list of participants, will be published online at the URL: <https://climaborough.eu/public-procurement/open-calls/maribor>.

Working language will be English. However, it is possible that this document and its Annex may also be made available in local language. The venue host reserves the right of not providing live translation and interpretation services.

Those who, for any reason, are in the impossibility of attending the event, can send written contributions, using the template provided as Annex, to the following address: Mateja.Bitenc@maribor.si.

Contributions will be accepted until **31 July 2023**. Unless otherwise requested, for reasons of business confidentiality (see Section 7) they will be published together with the event proceedings at the same URL mentioned above.

3 Purpose of the Preliminary Market Consultation

The purpose of the Preliminary Market Consultation is to acquire information regarding potential solutions that already exist in the market or result from ongoing/past research and innovation efforts, for the problem (or Challenge) stated in the next section of this document.

Economic operators, including research institutions in the domain of the Challenge, SMEs and start-up enterprises and/or natural persons are invited to participate and provide inputs. The feedback received in the frame of this consultation will be used to support the design and launch by ANCI Toscana, on behalf and upon mandate of the City, of a call for tender using the instrument of Innovation Partnership (as per *art. 31 of directive 2014/24/EU*). It is expected that the procurement will be launched in September 2023.

The principles of equal treatment, transparency, and non-discrimination will be duly enforced by ANCI Toscana and the City of Maribor for all participants. This to avoid creating unfair advantages or undue penalizations and ultimately distorting competition. For the avoidance of any doubt, responding to this consultation is entirely optional and without prejudice to the right of participation in the future public procurement.

Likewise, the description of the problem (or Challenge) is intended solely for the purpose of providing context information to the participants. The actual definition of the tender requirements will only be made available in the call's Terms of Reference.

Finally, the (oral or written) contributions provided in the context of this consultation are only suggestive and cannot be considered in any way binding on the preparation of the procurement documentation.

4 Problem to be solved (aka Description of the Challenge)

The City of Maribor is the 2nd largest city in Slovenia, with the 2nd largest University.

To better address environmental issues, Maribor has set up a joint municipal administration together with neighbouring municipalities (functional urban areas) namely, Joint Environmental Protection Service (SSVO).

In 2018 a new Automated Sorting Plant for municipal solid waste built by a waste utility company owned by the city, opened. This plant has the capacity of sorting 52,000 tonnes of waste per year. In the first year the plant sorted around 26,000 tonnes of Municipal Solid Waste in testing mode and since 2021 it is fully operational with full capacities.

As an alternative to further upgrading the plant capacity, the City Hall is planning to reduce the mixed waste.

This means to increase the percentage of separate collection and recycling, reduce landfill waste, and

therefore GHG emissions from biodegradable waste and methane emissions from older landfills.

5 Expected characteristics of the solution(s) looked for

A socio-technical system promoting waste separation at source and appropriate dealing with gathered fractions by the citizens.

This could be achieved by informing, raising awareness and communicating with people as well as using new approaches to promote behavioural change such as social imitation, gamification and other incentives.

6 Agenda of the event

14.30 - 15.00: Attendee identification, technical rehearsals, welcome greetings.

15.00 - 15.30: Presentation of the challenge (by Mateja Bitenc, from the City of Maribor)

15.30 - 16.00: Q&A and free discussion of the challenge details

16.00 - 16.30: Presentation of the Procurement Call mechanism (by Francesco Molinari, from ANCI Toscana)

16.30 – 17.15: Q&A and discussion (possibly with pre-booked talks by selected members of the audience, including from remote locations, presenting state of the art solutions and/or prototypes)

17.15 – 17.30 Conclusions and final greetings.

7 Confidentiality clause

ANCI Toscana and the City of Maribor shall not disclose information provided by economic operators and/or natural persons in the framework of this Market Consultation which they have designated as confidential, including, but not limited to, technical or trade secrets and the confidential aspects of the feedback received. However, please note that the contents of the Annex will be made public at the following URL: <https://climaborough.eu/public-procurement/open-calls/cascais>.

It is therefore advisable to specifically mention the information or data that should be kept confidential and removed from the Annex prior to its publication.

However, please note that business confidentiality protection does not apply if it can be easily verified, using common sense and accessible sources, that the contents designated as confidential do, in fact, already belong to the public domain.

8 Data Protection

Any personal data shared in the context of the present market consultation will be processed in accordance with the *Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC*.

Personal Data Controller: ANCI Toscana: Mr Simone Gheri – simone.gheri@ancitoscana.it

Data Protection Officer: ANCI Toscana: Mr Besnik Mehmeti – besnik.mehmeti@ancitoscana.it

Rights/questions/complaints

You are entitled to access, rectify, limit, delete, transfer data or object to the processing of your personal data. If you wish to exercise any of these rights regarding the storage/use of your data, please contact our Personal Data Controller.

If you want to know how your personal data is used, or you feel that we have used your personal data in a way that violates the current legislation, please contact our Data Protection Officer.

9 Annex

Solution proposal form template including Permission to publish and Request for a speaking slot
