

The NetZeroCities Platform expands to new cities

We are happy to share that the Cities Mission Platform managed by NetZeroCities is now expanding its support to all cities across Europe and Horizon associated countries. This is great opportunity for cities eager to reach climate neutrality!

As part of the EU Cities Mission, the Mission Platform managed by NetZeroCities has been supporting 112 Mission Cities selected by the European Commission as they strive to reach climate neutrality by 2030.

Building on this experience and on the resources, tools and capacities created to support Mission Cities, the Mission Platform is now engaging with all cities across Europe and Horizon-associated countries wanting to move towards climate neutrality, regardless of their current climate progress. This is a great opportunity to learn from Mission Cities, drawing on their experiences and strategies to shape local approaches for climate neutrality, and to contribute to the broader EU Green Deal goal of achieving a climate-neutral Europe by 2050.

What's in for your city

The Mission Platform offers a set of services, tools resources and opportunities for cities to reinforce and accelerate climate action towards net zero. Cities engaging with the Platform will gain access to a blend of online and in-person activities, starting from the NetZeroCities Portal and including online groups, study visits, twinning with Mission Cities, and engagement at the national and regional level.

A dedicated Helpdesk is available to help cities as they navigate tools, resources and services available, and to guide them in accessing the appropriate support according to their unique context and needs.

How to get on board

To learn more on the support available and express your interest, please refer to NetZeroCities' step-by-step guide '(link below).

We encourage you to seize this opportunity and engage with the Mission Platform to unlock resources and guidance, accelerating your city's path towards climate neutrality.
